With every single AWAVE® product

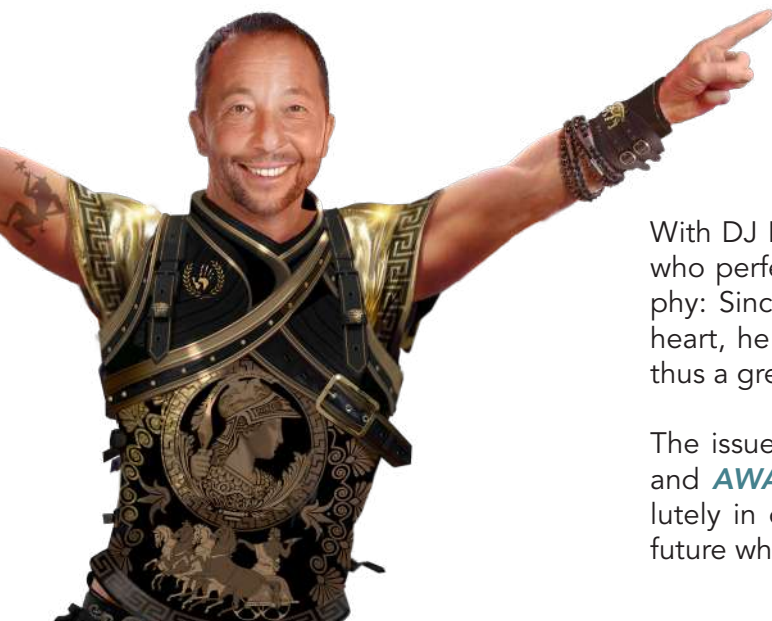

DOING GOOD TOGETHER!

The pollution of our nature and the seas has reached alarming levels, whereby the decisive advantage of plastic, its longevity and robustness, becomes a problem especially in relation to this. A PET bottle, for example, takes hundreds of years to disintegrate.

This is exactly where **AWAVE®** comes in, manufacturing **products from recycled PET (OCEAN BOUND PLASTIC)** that can themselves be recycled again. In this way, a cycle is created that is exemplified by Mother Nature.

DJ*BOBO

Advantages of rPET:

-  • reduces waste
-  • saves natural resources
-  • remains as a material
-  • saves transport costs, as existing raw materials are used
-  • has a significantly lower CO2 footprint than new material and thus reduces emissions decisively!

With DJ BoBo, **AWAVE®** was able to win a brand ambassador who perfectly embodies and lives its own responsible philosophy: Since his environment has always been very close to his heart, he has been involved in social projects for years and is thus a great role model for his fans and fellow human beings.

The issue of pollution is also very important to him. DJ BoBo and **AWAVE®** face the throwaway society together and resolutely in order to help creating a healthier, more dependable future which is worth living.
