STONELINE[®]

for a better future.

Individual and sustainable products.

WHY AWAVE®? THAT'S WHY!

Tobias Schmiederer, our CEO, supports with his brand STONELINE® worldwide many different environmental and climate protection projects. During his travels around the world he has always witnessed the consequences of our throwaway society especially in the seas.

Inspired by the concept of climate and carbon neutrality he decided to actively protect the environment. He developed innovative recycling solutions for sustainable products as one of the first companies. The idea for **AWAVE®** was born.

NATURE AS A MODEL.

In nature, everything revolves; there is no waste, but an eternal change of becoming and passing away.

Humans, on the other hand, breaks this natural cycle by producing things that cannot simply be reused. This creates unnecessarily large mountains of waste, whereby the decisive advantage of plastic, its longevity and robustness, becomes a problem. A PET bottle, for example, takes hundreds of years to decompose.

This is exactly where **AWAVE[®]** comes in, manufacturing products from recycled or bio-based plastics, which can also be recycled again. In this way, a cycle is created that is exemplified by Mother Nature.

The advantages are obvious as the use of recycled plastic...

-  • reduces waste
-  • saves natural resources
-  • remains as recyclable material
-  • saves transport costs
-  • has a lower CO2 footprint than new material and thus reduces emissions

ONE-WAY TO REUSABLE.

Second life of a PET bottle

After an extensive period of research and development we succeeded in developing a production process in which plastic waste can be transformed into durable raw materials which meet all quality requirements.

We use the following materials:

rPET is a **recycled plastic** of the polyester family which is mainly **made of used PET bottles**. There are special requirements for recycled PET which later comes into contact with food. Complex recycling and production processes are required. The advantage of our products: They are **food-safe** as well as **suitable for the dishwasher**.

In addition to rPET from Ocean (Bound) Plastic, **AWAVE®** also works with rPET from deposit return systems.

rPP is a **recycled plastic** which is, amongst other things, made of **disposed packaging, foils, bottle caps and straws**. It is harder, more durable and therefore ideal for products that are subjected to more intensive use, such as a shopping basket.

NO OIL AT ALL.

Bio-PE is a plastic based on renewable and **plant-based raw materials** such as **sugarcane**. Bio-PE is 100 % recyclable.

By **avoiding the use of fossil raw materials**, Bio-PE is an environmentally friendly and future-oriented alternative to conventional PE.

At the same time, it can be processed just as well and is equally robust and flexible in use.

FROM RECYCLED PET BOTTLES.

WE ARE MADE OF
21 PET BOTTLES

I'M MADE OF
6 PET BOTTLES

I'M MADE OF
8 PET BOTTLES

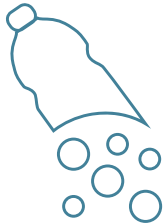

The numbers speak for themselves and if you can visually underline **how many bottles a recycled product consists of**, this is an unbeatable sales argument. Let's go the way together to make a positive decision for climate protection as well as for a clean future. Absolutely an added value!

SUSTAINABLE CAMPING.

People are travelling more with caravans, motorhomes and tents again. Entirely according to the motto: Yes we camp!

Our **AWAVE®** products are ideal for this purpose as they are **reusable, robust and durable**. In addition, the products are made of materials that protect our natural resources – totally in line with the spirit of camping!

Every product is recyclable
>>> a new cycle begins

DOING GOOD TOGETHER.

OUR
BRAND-
AMBASSADOR

DJ★BOBO

With DJ BoBo, **AWAVE®** has gained a down-to-earth and honest brand ambassador who perfectly embodies and lives our responsible philosophy.

In 2006, he was appointed by the UN as an ambassador against hunger at the World Food Program (WFP) and since then, he is intensively committed in the Third World. The issue of littering is also very close to his heart.

DJ BoBo and **AWAVE®** therefore hope together to resolutely confront the throwaway society and to help shape the future of all of us in a healthier, more durable and more livable way!

Our brand
